EDUCATION

SRM Institute of Science and Technology

B.Tech in Computer Science & Engineering (AI & ML) — CGPA: 9.37 / 10.0

Chennai, India

2024 – 2028

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++

AI / ML: RAG, LangChain, LangGraph, LLM Apps, Vector DBs, NLP, OpenCV, YOLO, TensorFlow, PyTorch

Web & Backend: React.js, Next.js, Node.js, FastAPI, Express.js, REST APIs

Databases: PostgreSQL, Supabase, Firebase, MongoDB, SQLite

Tools: Git, GitHub, Docker, n8n

EXPERIENCE

BitCot Technologies

Software Engineering Intern

Chennai, India

May 2026 – Present

- Engineered a multi-agent content generation platform (FastAPI, Celery, Redis, Supabase, Claude APIs) that produces content across multiple channels, cutting writers' production time by an estimated 60–70%.
- Built AI agents for trend discovery, ICP validation, content generation, research grounding, SEO analysis, and automated regeneration, projected to lift lead generation by 15–25%.
- Created an AI image-validation pipeline (web search + vision checks) that flags 100% of irrelevant, low-quality, or broken visuals before human review, saving editors ~10–15 minutes per post.

Ekagraha (Next-Gen Accounting Platform Startup)

Frontend Developer Intern

Remote

May 2025 – Apr 2026

- Developed frontend modules for Purchase Bills and Masters with Next.js 15, React 19, Zustand, and TanStack Query.
- Integrated REST APIs and validation workflows for accounting and taxation modules.
- Contributed to enterprise-grade business accounting software supporting GST, banking, inventory, and taxation workflows.

PROJECTS

DoItForMe — Student Freelance & Marketplace Platform

Next.js, Supabase, PostgreSQL, Cashfree

- Built a campus freelance and services marketplace with Next.js, Supabase, PostgreSQL, and Cashfree.
- Implemented AI-powered KYC verification with Gemini Vision and two-layer moderation (DistilBERT + server-side filtering).
- Designed escrow-based payments, real-time chat, automated payouts, and role-based dashboards; platform scaled to 1000+ users and 6000+ visits.

Sanjeevani — Waterborne Disease Outbreak Prediction

FastAPI, LangChain, ChromaDB, XGBoost

- Developed a public-health surveillance system integrating IoT streams, hospital reports, ASHA worker inputs, and satellite data.
- Built a multilingual RAG chatbot with FastAPI, LangChain, ChromaDB, HuggingFace embeddings, and voice interfaces for community health guidance.
- Implemented outbreak-prediction pipelines using Random Forest and XGBoost models, with automated alert generation and authority notifications.

AI Retail Intelligence — Smart Store Surveillance

YOLO, OpenCV, React, Supabase, Gemini AI

- Engineered a multi-camera retail surveillance system with YOLO and OpenCV for real-time threat detection.
- Developed theft-detection pipelines combining trajectory analysis, dwell-time heuristics, velocity monitoring, and video evidence recording.
- Implemented fire and smoke detection, AI-generated insights, and real-time dashboards (React, Supabase, Gemini AI).

LEADERSHIP & ACHIEVEMENTS

- Competed in 20+ national hackathons and ideathons — won 3+ ideathons and multiple Top-5 finishes.
- Secured 1st place in the problem statement category and finished among the Top 10 teams out of 3000+ participants at Hack2Future, IIIT Dharwad.
- 2nd overall and 1st in problem statement at Foundathon 3.0.
- Qualified for Smart India Hackathon (SIH) 2025, selected among the top 40 teams in the college internal round.
- Delivered sessions on AI Agents and Workflow Automation (n8n) to 150+ students.

CERTIFICATIONS

BNY Joint Certification | IBM Quantum Enigmas (2026) | Summer Analytics, IIT Guwahati (2025)
